

ABSTRACT

~~The present invention relates to an~~ An image photographing apparatus for always ~~automatically~~ focusing ~~an image a~~ photographed by ~~an image is capture~~ device ~~automatically~~ to improve the image quality. The ~~present invention image photographing apparatus~~ automatically focuses the image through a zoom actuator for changing a zoom ratio and a focus actuator for controlling the focus to thereby enhance the image quality. Also, the ~~invention further image photographing apparatus~~ adds a zooming function to diversify the application fields of ~~an image~~ photographing.
